

FIG S1832 MOTOBALANCE

The Hattersley Fig 1832 range of MotoBalance valves has been modified to enhance the features of the product. The new valves will be Fig S1832, S1832L and S1832M and will replace the current 1832, 1832L and 1832M. The globe valve has a profiled disc that gives equal percentage flow control and a new graduated dial which makes adjusting and setting the valve much easier. The ½" valves have a colour coded dial to enable easy identification of standard (white), medium (yellow) and low flow (green) versions.

The part numbers affected are listed below, along with the new list prices. All existing orders will be honoured, any new orders placed going forward will be the new Fig S1832.

Part Number	Description	New Part Number	New Description
004B01832JW	1832 1/2 PN16	004BR1832JW	S1832 1/2
004B01832JW APA	1832L 1/2 PN16 LOW FLOW	004BR1832JWL	S1832L 1/2
004B01832JW CVJ	1832M 1/2 PN16 MED FLOW	004BR1832JWM	S1832M 1/2
006B01832JW	1832 3/4 PN16	006BR1832JW	S1832 3/4

The actuators to control the valves are a new range for Hattersley. Two are available, a 3 point actuator and a modulating actuator. One size actuator is suitable for all 4 MotoBalance valves.

Part Number	Description
000MA0700J	A700 3 POINT 24V ACTUATOR
000MAM710J	AM710 MODULATING 24V ACTUATOR
